Prompt Analysis Issues

Check	Requirement	Value	Comment
Prompt Analysis	Subject Data Consistency - Room Counts	Not Fulfilled	The stated bedroom count (3) is inconsistent with the visual representation on the sketch/floor plan (2 labeled bedrooms). The total room count and bathroom count are consistent.
Prompt Analysis	Sales Comparison Approach - Proximity to Subject within 1 mile	Not Fulfilled	Comparable 4 (964 Ellery Dr, 2.51 miles N) is not within 1 mile of the subject. The Supplemental Addendum acknowledges this, stating it was included to illustrate the Principle of Substitution and that the distance was an arbitrary client-set limit.
Prompt Analysis	Sales Comparison Approach - Sales or Financing Concessions	Not Fulfilled	Comparables 1 and 2 have reported concessions ($6990 and $3000 respectively) but show $0 adjustments. The report explains this by stating adjustments are only made for 'creative financing' and these concessions were not part of it.
Prompt Analysis	Sales Comparison Approach - Date of Sale/Time, Sale date vs. contract date, within 1 year, adjustments	Not Fulfilled	For Comps 1, 2, and 3, the sale date is greater than the contract date and within 1 year. However, Comp 4 is listed as a 'listing' with a contract date, not a sale, making the sale date comparison inapplicable. All comparables show $0 adjustments for Date of Sale/Time, which is consistent with the report's overall policy of no quantitative adjustments.
Prompt Analysis	Sales Comparison Approach - Site adjustment logic	Not Fulfilled	All comparables have larger site sizes than the subject, but all show $0 adjustments. This is inconsistent with the general rule (negative adjustment for superior site) but consistent with the report's stated policy of no quantitative adjustments.
Prompt Analysis	Sales Comparison Approach - Quality of Construction, Actual Age, Condition adjustments	Not Fulfilled	Quality of Construction and Condition are consistent, resulting in logical $0 adjustments. However, Actual Age varies significantly for Comp 3 (8 years vs. subject's 18 years), but still shows a $0 adjustment, which is inconsistent with typical adjustment logic but consistent with the report's overall policy of no quantitative adjustments.
Prompt Analysis	Sales Comparison Approach - Basement & Finished Rooms Below Grade, Functional Utility, Heating/Cooling, Energy Efficient Items, Garage/Carport, Porch/Patio/Deck adjustments	Not Fulfilled	Basement & Finished Rooms Below Grade, Functional Utility, Heating/Cooling, and Energy Efficient Items are consistent, resulting in logical $0 adjustments. However, Garage/Carport varies for Comps 2 and 4 compared to the subject, but still shows $0 adjustments, which is inconsistent with typical adjustment logic but consistent with the report's overall policy of no quantitative adjustments.
