Prompt Analysis Issues

Check	Requirement	Value	Comment
Prompt Analysis	Sales Grid & Value Analysis - Adjustment Logic (Condition)	Not Fulfilled	The subject's condition is C2, while all comparables are rated C1 (superior). However, the condition adjustment for all comparables is $0, which is illogical as superior comparables should receive a negative adjustment.
Prompt Analysis	Sales Comparison Approach - Indicated Value vs. Unadjusted Sales Price	Not Fulfilled	The indicated value ($1,472,000) is within the range of unadjusted comparable sales prices ($1,025,000 to $1,650,000). However, the literal interpretation of 'is 10% higher than unadjusted sales price' is not met, as the indicated value is not exactly 10% higher than any single unadjusted sale price.
Prompt Analysis	Sales Comparison Approach - Date of Sale/Time	Not Fulfilled	For Comparable 1, the sale date (10/25) is not greater than the contract date (10/25). All other closed comparables have sale dates greater than contract dates and are within one year. Adjustments for Date of Sale/Time are $0, which is consistent with the stable market conditions noted.
Prompt Analysis	Sales Comparison Approach - Site adjustment	Not Fulfilled	Site adjustments are consistently $0 for all comparables, which is illogical given that comparable site sizes vary relative to the subject's site size (2715 sf).
Prompt Analysis	Sales Comparison Approach - Quality of Construction, Actual Age, Condition adjustments	Not Fulfilled	Quality of Construction and Actual Age adjustments are consistently $0, which is logical. However, Condition adjustments are $0 despite the subject being C2 and all comparables being C1 (superior), which is illogical.
Prompt Analysis	Sales Comparison Approach - Basement & Finished Rooms Below Grade, Functional Utility, Heating/Cooling, Energy Efficient Items, Garage/Carport, Porch/Patio/Deck, Pool adjustments	Not Fulfilled	Adjustments for Basement & Finished Rooms Below Grade, Functional Utility, Heating/Cooling, Energy Efficient Items, Garage/Carport, and Porch/Patio/Deck are consistently $0, which is logical. However, the subject has a pool while comparables do not, yet the pool adjustment is $0 for all comparables, which is illogical.
